

LAPIS GLOBAL TOP 30 CRYPTO ASSET LIST Q1-2023

Lapis Global Top 30 Crypto Asset Index is composed of the worldwide largest 30 crypto assets, also known as cryptocurrencies or tokens. Only crypto assets that are easily tradable and can be relatively safely stored by our custodian are taken into account. Moreover, all stablecoins, fun tokens and privacy coins are excluded. In addition, we use a two-stage equal weighting model in our index calculation. The largest 5 crypto assets are weighted with 10% each and the next 25 crypto assets are weighted with 2% each. The index is rebalanced on a quarterly basis (end of March, June, September, and December).
