What is this product?

Type

The product is a unit of the sub-fund Lapis Global Medical Devices 25 Dividend Yield Fund (the sub-fund) of Multilabel SICAV (the "Umbrella Fund"), a "société d'investissement à capital variable" (SICAV) and is authorised as an undertaking for collective investment in transferable securities (UCITS) in accordance with Part I of the Law of 17 December 2010 on undertakings for collective investment (the "Law of 2010").

Term

The fund has no maturity date. The Fund could be closed under the conditions led down in the current prospectus of the Fund.

Objectives

Investment Objective

The objective of the sub-fund ("Fund") is to achieve long-term capital growth by investing its assets in a portfolio of shares and other equity securities and rights of, in principle, 25 companies in the healthcare sector. In particular, the Fund may favour investments in companies engaged in the research, development, production and marketing of products in the field of medical technology.

Investment Policy

The Fund may invest up to 20% of its assets in money market instruments. The Fund does not use derivatives.

The Fund is actively managed and does not follow any benchmark index. It has freedom of choice concerning investments and their weighting.

Share Class Policy:

The Fund has several share classes. These may differ with regard to fees, minimum investment, use of revenues and investor qualification.

Income is reinvested in the share class.

Processing of subscription and redemption orders

Investors may buy or sell the Fund on any bank working day in Luxembourg.

Intended retail Investor

The fund is aimed at retail clients, professional clients and eligible counterparties, who intend general capital formation and have a mid-term investment horizon. This fund is for investors with basic knowledge or experience with financial products. The investor can bear financial losses and attaches no importance to capital guarantees.

Depository

The Custodian is State Street Bank International GmbH, Luxembourg Branch, 49, Avenue J.F. Kennedy, L-1855 Luxembourg.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. If you choose a foreign currency share class you will be exposed to currency risk and your final return will depend on the exchange rate between the foreign currency and your local currency. The risk is not considered in the indicator shown above.

You can find more information about the other risks in the prospectus at funds.gam.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
		10,000 EUR	
Example Investment:		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	750 EUR	860 EUR
	Average return each year	-92.50%	-38.78%
Unfavourable	What you might get back after costs	8,930 EUR	9,420 EUR
	Average return each year	-10.70%	-1.19%
Moderate	What you might get back after costs	10,820 EUR	17,800 EUR
	Average return each year	8.20%	12.22%
Favourable	What you might get back after costs	13,890 EUR	20,220 EUR
	Average return each year	38.90%	15.12%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using a suitable benchmark between September 2021 and January 2023.

Moderate scenario: This type of scenario occurred for an investment using a suitable benchmark between February 2013 and February 2018.

Favourable scenario: This type of scenario occurred for an investment using a suitable benchmark between September 2013 and September 2018.

What happens if GAM (Luxembourg) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of the Fund Management Company. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	571 EUR	2,323 EUR
Annual cost impact (*)	5.8%	2.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.5 % before costs and 13.9 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.00% of the amount you pay in when entering this investment.	Up to 300 EUR
Exit costs	1.00% of your investment before it is paid out to you.	101 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.52% of the value of your investment per year. This is an estimate based on actual costs over the last year.	152 EUR
Transaction costs	0.18% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	18 EUR
Incidental costs taken under specific conditions		
Performance fees (*)	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You may buy or sell shares in the product, without penalty, on any normal business day as further documented in the fund's documents. Please contact your broker, financial adviser or distributor for information on any costs and charges relating to the sale of the shares. If you cash in at an early stage this might increase the risk of lower investment returns or a loss.
